

# HURON SAFETY

THE BUSINESS OF RESEARCH IS ONLY GETTING MORE COMPLEX AND CHALLENGING

The fiercely competitive research environment challenges institutions to maintain a world-class research enterprise that moves society forward, promotes innovation and advances knowledge — all without adding additional administrative burden to researchers.

**Strengthen your safety committee oversight processes** while accelerating preparation, submission and review of research studies with Huron’s Safety solution. Huron Safety incorporates forms for biosafety, radiation safety, chemical safety and stem cell research oversight. The solution also accommodates standalone safety protocols and the ability to relate a Safety protocol to one or more IACUC protocols.

Huron Safety also improves collaboration between investigators, safety staff, safety officers and committee members through all safety activities from new protocols to amendments to continuing reviews.

Huron Safety is part of the Huron Research Suite, a comprehensive solution to facilitate communication, relieve administrative burden and free up time for what matters most — your research mission.
